

## Electoral Literacy Club

The Election Commission of India intends to foster the culture of electoral involvement among young and future voters through ELC. Colleges can play a significant role in this connection.

Our college will establish an Electoral Literacy Club with the following goals:

Through hands-on experience, teach the student about voter registration, the political process, and related issues.

To familiarise the student populations with EVMs and VVPATs, as well as to educate them on the resilience of EVMs and the integrity of the election process utilising EVMs.

To assist the students in understanding the importance of their vote in order for them to exercise their right to vote in a confident, comfortable, and ethical manner.

Using the capacity of ELC members to spread electoral literacy.

To make voter registration easier for its eligible members who aren't already enrolled

Creating a culture of electoral participation, maximising informed and ethical voting, and adhering to the principles of "Every vote counts" and "No Voter Left Behind."

This can be done through following activities:

### Activities

- Observance of constitution day
- Preamble reading
- Participation in quiz competition.
- Observance of national voters day.
- Participation in poster making competition

### Outcome

The observance of the day will encourages individuals to have more empathy for one another, as well as tolerance and friendship. The celebration of these days will contributes to the advancement of equality in human dignity. By commemorating this day, we hope to show appreciation for the work done by the men who were instrumental in drafting the Constitution and educate the student body about the most important principles upheld by the document.
