describes the tweaks of taking the page on top position in Google by increasing the Page rank which may result in the improved visibility and profitable deal for an organization. Google is the most user-friendly search engine, which gives user-oriented results. In addition, most of the other search engines use Google search patterns; so we have concentrated on it. So, if a page is optimized in Google it is optimized for most of the search engines.

Searching is one of the most used actions on the Internet. Search engines as an instrument of searching, are very popular and frequently used sites. This is the reason why webmasters and every ordinary user on the Internet, must have good knowledge about search engines and searching.

Webmasters use major search engines for submitting their sites on it, and for searching. Ordinary users use major search engines primarily for searching, and sometimes for submitting their homepages or small sites.

If you are webmaster, you will also need some information while preparing site for the Web and you will also use search engines. Then, when you finish with it, you must submit your URL to many search engines. After that you will check your URL ranking on every search engine... There are also hot news on every major search engine, many other interesting contents... All of this shortly describes why search engines are so popular.

We also get elevated by the response of the students and benefits that our students going to receive in the future. We are also motivated to organize such seminars in the future so that our students will get benefitted by such programmes.

Mrs. Samata Mane took the opportunity of welcoming the guests and thanking them for their decision to spend time with the students of the college. she also appreciated the faculty coordinators who

helped manage and make the event work out in a short period of notice.

Mrs. Poonam Sonar delivered the vote of thanks which marked the end of the formal session.
