Action Taken Report on the Feedbacks received from the students for the year 2018-19

As a practice to improve yearly feedback is collected from the students for further improvisation. Accordingly for this year 2018-19 the feedback was collected and the following course of action was taken.

The study material used currently the students are satisfied. But still it was decided that some additional material though not included in syllabus needs to be provided which will help the students in enhancing their knowledge further. Accordingly the teaching staff was involved and some more reference books list was prepaid and handed over to the concerned library incharge with necessary approvals and accordingly the books were made available in the library.

The syllabus that is currently used as per the Mumbai University is not that much sufficient to students to make them fit for job as per their responses. It needs to be more practical or skill based. Accordingly the same was discussed in the CDC and some more add on courses were decided to be introduced in the coming academic year. The teachers are attending regularly the workshops on syllabus arranged by the university. They are informing the Board of Studies members of the university about the syllabus revisions as per the students responses by way of verbal suggestions during the workshops.

The college is frequently arranging the workshops/special lectures etc. This should be further increased by inviting industry persons so that student will come to know what exactly is required from them by the industry.

The workshops / seminars conducted from time to time help them gain more knowledge and and hence more no. of such sessions will be arranged in the days to come.

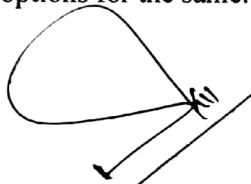

The college is always encouraging the students to participate in co-curricular activities. Looking at the student's willingness and talent it was decided to provide them with additional

guidance. For this the theater people relating to dram\dance were finalized and they will be called to guide the interested students in this connection. The task for its execution was entrusted to the cultural committee.

The feedback regarding requirement of smart classrooms was also taken from the students. Though the response was of mix nature where some wanted and some of the students said no. but it was felt that to keep up with the time the digital classrooms will become the need in future the matter was discussed and accordingly the IT department was asked to find the feasible options for the same.
